

**WESTERN ENERGY STORAGE
TASKFORCE (WEST)**

Go WEST: Shaping Western Storage Markets

Western Energy Storage Taskforce (WEST) is committed to ensuring energy storage in all its forms is properly represented in planning and procurement venues across Western markets, through compelling, evidence-based, technology-neutral advocacy.

For more than a decade, CESA has advocated to make energy storage a mainstream grid resource in California. Now, CESA is expanding its focus to support market development efforts in nearby Western states as the Western grid becomes more interconnected.

The WEST 2022 Package Includes:

Price: \$10,000

Monthly working group meetings from June – December with planning and procurement action updates

Ability to provide comments and feedback on how to ensure energy storage in all its forms is properly represented

Opportunities to talk to and hear from key decision makers across emerging Western markets

WEST COVERAGE

WEST will cover and track emerging developments in these states:
Arizona, Colorado, New Mexico, Oregon and Washington.

JOIN WEST

Exclusive for CESA members only.
